

Jamiu Lasisi

Technical Delivery Manager | Data & Platform

Glasgow, UK | +44 7312905510 | jmlasisi32@gmail.com | [LinkedIn](#)

PROFILE

Delivery Manager with 8+ years' experience leading technology delivery teams to measurable business outcomes across financial services, technology consulting, and FMCG. Comfortable flexing between Agile and more structured project delivery approaches based on the needs, and experienced in managing risks, issues, dependencies, and delivery blockers to keep programmes on track. Builds strong working relationships with business stakeholders, technical teams, and external partners, with a consistent record of successfully transitioning new or changed technology services into live operation. Used to operating in regulated, complex environments where governance and pace both matter.

AREAS OF EXPERTISE

- Technology Delivery Leadership (Agile & Structured)
- Risk, Issue & Dependency Management
- Stakeholder Management & Influence
- Roadmap Support & Resource Planning
- Transition to Live Operations & Business Readiness
- Governance, Risk & Regulatory Compliance
- Cross-Functional & Cross-Team Coordination
- Flow Metrics, DORA Metrics & Delivery Reporting

Frameworks: Scrum, SAFe, Kanban, Lean, TDD, BDD, XP, DevOps | Tools: Jira, Confluence, Azure DevOps, Miro, MS Excel, MS Power BI, Minitab

PROFESSIONAL EXPERIENCE

Business Agility Lead

2025 — Present

JPMorgan Chase — Glasgow, UK

- Lead delivery for 5 cross-functional squads (45+ engineers, analysts, and product stakeholders), directing multiple concurrent technology programmes (CRM, analytics, payments platforms) and aligning execution with business and regulatory objectives.
- Manage risks, issues, dependencies, and delivery blockers across teams, reducing delivery blockers by 20% and keeping programme progress on track.
- Coordinate delivery across teams spanning four time zones (UK, IST, EST, CST), adapting events, handoffs, and communication cadence to keep distributed squads aligned.
- Build and maintain strong working relationships with business stakeholders and technical leads, improving delivery predictability by 15% and reducing stakeholder reporting turnaround time by 30% through data-driven dashboards.
- Strengthen governance and control adherence within a regulated banking environment, balancing pace of delivery with compliance requirements.

Change Delivery Manager

2024 — 2025

7ven Oaks Limited — London, UK

- Led delivery of 2 major CRM and marketing analytics transformation projects, coordinating delivery teams, Product Owners, and business stakeholders to keep execution aligned to priorities.
- Managed risks and dependencies across programmes, ensuring consistent delivery in a complex, regulated environment.
- Improved sprint readiness and reduced rework by 15% by tightening backlog refinement and prioritisation with Product Owners.

Lean Six Sigma Process Engineer (Change & Transformation)

2023 — 2024

Abbott Rapid Diagnostics (Randstad Solutions Contracting) — Dundee, UK

- Delivered an enterprise ERP and data platform transformation programme impacting supply chain operations, working across multiple business and technical teams through to successful adoption.
- Led business readiness and change activities across 25+ stakeholders, ensuring the new platform capability was properly embedded into live operation.
- Improved workflow efficiency by 20%, reducing process cycle time and removing manual bottlenecks that had been slowing delivery.

Agile Delivery Manager

2021 — 2023

Tritek Consulting Limited — London, UK

- Managed delivery of multiple digital, data, and AI-enabled programmes across EdTech and HealthTech platforms, leading cross-functional teams of 15–25 people spanning engineering, product, and data.
- Improved delivery timelines by 20%, accelerating time-to-market for key platform features through better sequencing and dependency management.

Agile Delivery Manager

2019 — 2021

Hundred Degrees Company — Lagos, Nigeria

- Led delivery of fintech platforms (mobile banking, digital wallets, KYC solutions) across multiple Agile teams, improving team productivity by 15%.
- Delivered multiple product releases that enhanced customer experience and platform scalability.

Process Manager

2013 — 2019

The Heineken Company (NB Plc) — Lagos, Nigeria

- Led process optimisation initiatives across production and utilities operations, reducing operational costs by 15% and improving process reliability.
- Delivered change initiatives that reduced downtime and contributed to overall plant performance improvements.

Additional experience: Junior Agile Project Manager / Business Analyst, Hundred Degrees Company, Lagos, Nigeria, 2019

EDUCATION

Bachelor of Science in Process Engineering — University of Lagos
